

The Buissnes Plan

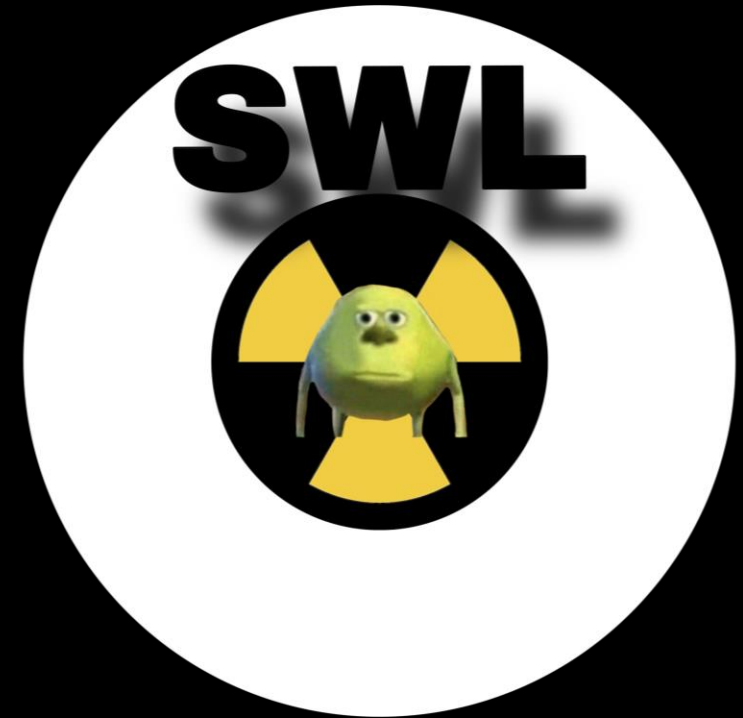

(this all didn't do profesinals do this at home with no supervision!)

Our Buisness plan contains 3 companies

1. SWL
2. B&B
3. VHUM

SWL (Selling Without License)

- At SWL (Selling Without License), we specialize in selling nuclear bombs to qualified buyers. Our bombs are supplied by the trusted manufacturer, B&B. To ensure safety and responsibility, every customer must pass a detailed test before making a purchase. Each nuclear bomb is priced at \$1 million, reflecting its value and exclusivity. At SWL, we pride ourselves on providing top-tier products and a professional customer experience.

B&B (Bomb&Boom)

- At the B&B factory, we assemble. The work is quite dangerous, because the nuclear weapon could explode at any moment. Company VHUM gives us resources to build nuclear weapons using a radioactive material "Uranium". Then deliver to the SWL

VHUM (Very Humaine Urainium Mine)

- Our work is transfor uranium to the B&B. For that we found a mine containing urainium. There our staff with out any special equipment mine it. After that we : Clean,Sort and send it in non metal boxes to the B&B.

Thank you for youre attention. See you soon!

- Very soon...
